Education

MCA (Master of Computer Application) Distance learning

LPU (Lovely Professional University)

May 2024 – Present

Phagwara, Punjab

Universal institute

MERN Stack web development course.

Apr 2021 – May 2022

Indore, Madhya Pradesh

B.com in Computer Application

K.K College (affiliated with D.A.V.V. UNIVERSITY)

Aug 2017 – Jul 2020

Indore, Madhya Pradesh

Professional Summary

Skilled web Dynamic Full-Stack Developer with **2+ years of professional experience** in building robust web applications. Adept at designing scalable architectures, optimizing database performance, and creating intuitive user interfaces. Proficient in **Node.js, React.js, MySQL, PostgreSQL, and MongoDB**, with hands-on experience in **microservices architecture** and **third-party API integrations**. Proven ability to deliver high-quality solutions that enhance efficiency and user experience.

Work Experience | (2+ Years)

Full-Stack Web Developer | Kylient Software Solution Pvt. Ltd.

Feb 2023 - Present

Backend Development:

- Designed and implemented scalable backend architectures using Node.js and Express.js.
- Integrated third-party APIs, including BigCommerce, for efficient multi-store management and real-time data synchronization.
- Developed robust database solutions with MySQL and PostgreSQL, ensuring optimal query performance and data integrity.
- Implemented **role-based access control (RBAC)** for multi-user applications, enhancing data security and compliance.
- Managed **third-party integrations** with payment gateways, email services, and authentication providers like Google OAuth.
- Developed microservices architecture for critical modules, enabling dynamic scaling and improved fault tolerance.

Database:

- Designed and maintained database schemas in MySQL/PostgreSQL to support scalable API architectures.
- Optimized complex SQL queries, achieving up to 30% performance improvement in data retrieval operations.
- Enhanced scalability and performance, supporting high transaction loads with minimal downtime.
- Implemented database normalization and indexing strategies to minimize redundancy and enhance query performance.
- Integrated robust **data validation** mechanisms at the database level, improving overall system reliability.
- Built admin panels with bulk upload functionality via CSV files and role-based access control.

Frontend Development:

- Created user-friendly interfaces with React.js, React-Bootstrap, and MUI for enhanced user interaction.
- Developed responsive web applications with Next.js, focusing on performance and cross-device compatibility.
- Integrated frontend and backend seamlessly for features like employee tracking, reporting, and real-time data updates.

Technical Skills

Backend: JavaScript (ES6+), Node JS, Express JS, NextJS

Frontend: HTML5/CSS3, NextJS, React JS, MUI, Bootstrap, TailwindCSS.

Database: MySQL, PostgreSQL, NoSql, MongoDB, AWS-S3 Bucket.

Developer Tools: VS-Code, GitHub, GitLab, Bitbucket, Postman, Swagger, Asana.

Others: REST API's, Third-Party API Integration, JSON

Soft Skills

- Strong leadership and team management abilities.
- Excellent time management and multitasking skills.
- Proven problem-solving capabilities in fast-paced environments.

Certifications

- MERN Stack Certification, Universal Institute, Indore, MP (2022)

Hobbies/Extracurricular Activities

- Building personal projects and solving technical problems.
- Listening Music.
